Grid Control 1 (GC1) and Grid Control 2 (GC2) Explained

The *Third-Party Verification Test (Physical and Chemical)* are made up of 2 grid controls and they are linked thru their *Reference No.* Whatever record is pointed at the parent grid control are all displayed in the child grid control. We can say that grid control 1 is the header, and grid control 2 are its contents. Please refer to the screen shot below,

According to Philippine National Standards for Drinking Water (PNSDW) of 2017, Physical and Chemical Test values must be complied by businesses dealing with drinking water.

This is a compilation of test records for Physical and Chemical conducted by third-party testing laboratories.

The Test Records are kept in the database and can be displayed
